Opis produktu

Belgium's most infamous Death Metal crew ABORTED deliver a bone-crushing display of unyielding and odious Death Metal with their forthcoming 11th full length, ManiaCult. Standout tracks like "Impetus Odi" and "Dementophobia" prove the point that the band undisputedly earned their place within the cream of the crop of Death Metal. ManiaCult is a whirring blender of Death Metal and further solidifies ABORTED's stature as one of the most dangerous death metal bands on the planet. You've been warned. The album will be available as CD Jewelcase, Gatefold black LP+CD & Poster, as Ltd. Deluxe CD Box Set incl. Metal-Pin, shaped patch & CD format pop up card as well as on all digital platforms.
