'Earth Infernal' is a product of the times that birthed it, and could only be the work of Satan. Having churned out cutting edge heavy metal throughout the 80's - and reunited in 2011 - their sixth full-length maintains the high standard they long ago set, and it is perhaps their timeliest release. "For two years the world has been preoccupied with politics and pandemics and while we were all looking the other way our planet has continued to get hotter," says guitarist Russ Tippins. "Our Earth is now infernally hot. Almost irreversibly so. We are on a one way trip to Hell and dragging our children and their children along with us. Yes, Satan has something to say about global warming."
