Opis produktu

DARK SYMPHONIES is honored to announce our continued cooperation with pre-DARKANE Swedish death metal act AGRETATOR to reissue their long out of print sophomore release "Distorted Logic". More experimental than "Delusions", "Distorted Logic" shows the band's natural progression which would lead to the inception of DARKANE!

Additionally, we will be including band's 1997 "Infected" Demo as well as the band's 2 DEMISE (pre-Agretator) demos "Prophesy" from 1991 and "Visions" from 1992. This is a must-have to see where Darkane started out, or just for fans of Death Metal in General!

This CD will be designed after the original 1996 self financed released release, taking elements from the original layout with attention to detail, even down to the logo and typeface for a touch of nostalgia. Also included are brand new liner notes from original founding member and guitarist / vocalist Pierre Richter.

Additionally, a Japanese-style OBI-Strip will be included.

CD limited to 1000 copies worldwide! Stay away from BOOTLEGS! Support the band and official releases!!
