Opis produktu

Very few bands have survived such a duration and Outre-Tombe whom previously rested alongside other predecessors from north America has now decidedly outlived the majority. Equal parts hateful and sombre, their dedication to minimalism is stern and theirs alone. The elements are traditional and youthful - love them or hate them but in the end their black metal is singular and theirs alone. 6 concise refined tracks where the evil spirit of displaced youth returns to haunt and rattle inside the skeletons of the modern world.
