Opis produktu

THE CRYPT is proud to announce our cooperation with legendary Australian black / death metal act ANATOMY, to release their long OOP classic 1993 EP "Twisting Depths of Horror" along with their early demos "Dark Religion" from 1991, "For Those Whose Eyes Are Black" from 1992, plus an unreleased bonus studio track from 1995 "Under the Wings".

Anatomy comes from a time when music had spirit and feeling. Recorded Reel-to-Reel in The Abyss, capturing their audible sinister energy and the reverberation from hell. Pure Dark Death Metal! Original Chris -Thorncross- Moyen cover art from 1993 and as well as Thorncross' The Fall artwork from 2006, as well as lyrics, liner notes, tons of exclusive band photos and original layout elements designed after the original Dark Oceans CD with attention to detail, even down to the logo and typeface for a touch of nostalgia.

150 copies on classic black vinyl and will come housed in a 350 gram gatefold jacket.
