## Opis produktu

A remastered edtion of For Snow Covered the Northland on black vinyl with printed inner sleeve and lyrics.

On the back of this, a deal was signed with Italian label Avantgarde Music, leading to the recording of the full length debut album, 'For Snow Covered the Northland'. The studio sessions took place in December of 1994, though the album did not see the light of day until 1996.

'For Snow Covered the Northland' was a triumphant journey of atmospheric and melodic blackened doom metal, with sombre and hypnotic guitar leads permeating the album to great effect amid the anguished screams. Also utilising acoustic guitar and piano/keyboard passages, the opus overall exudes an ambience of deep melancholy and despair.

The album was recorded at The Garageland Studio, and produced by Henrik Kjellberg.
