Death metal gods Cancer burst onto the UK extreme metal scene thirty-five years ago, & established a strong global following over the course of their seven studio albums, including a stint with major label EastWest under Warner Music. 2018's 'Shadow Gripped' album reunited the core band for the first time since 1995 for a new masterclass of twisted savagery, & 2025's 'Inverted World' showed the recently reinvigourated band had lost none of its passion for relentless old school brutality.
