Echoes Of Light is the newest album by CHAPEL OF DISEASE and is the outcome of an even deeper dive into the possibilities as a band when set free from any musical or genre-based boundaries. Recorded from October 2022 up to January 2023 at Q7 Studios with Michael Zech (THE RUINS OF BEVERAST, SECRET OF THE MOON) by the three founding members (Laurent T., Cedric T. and David D.), the outcome is a record that plays with many different moods and becomes a whole through uniting contrasts and forming them into one individual landscape of sound. Consisting of six songs, this album wants to take you on a journey to chase light, only to ultimately destroy it...
