Opis produktu

German brutal death metallers **CYTOTOXIN** have unveiled the track-listing and artwork, and announced the release of their 4th LP *Nuklearth*, set for release on 21st August via **Unique Leader Records**.

During the night of April 26th in 1986 a world-changing accident occurred at the Chernobyl nuclear power plant in Ukraine. Inspired by this catastrophe and its consequences, **CYTOTOXIN** first pulverised the death metal world in 2010.

In 2011 the band released their self-produced full-length album *Plutonium Heaven,* and the following year they entered **Kohlekeller Studios (Aborted, Benighted)** to forge their highly appreciated second record *Radiophobia*. Since the release of *Radiophobia* via **Unique Leader Records** in 2012, **CYTOTOXIN** continually toured the clubs and festivals of Europe. In January 2017 the band returned to **Kohlekeller Studios** to record their highly anticipated third album *Gammageddon,* which was released later that year.

Ready to conquer the world with their new weapon *Nuklearth*, you better keep your gasmask at hand.
