Opis produktu

CD in JakeBox.
The JakeBox is an eco friendly packaging product. Its most significant characteristic is the folded "claw" that holds the disc, and in an eye-catching way unfolds itself, presenting the disc, lifting it up and making it easily accessible.

Nordic folk/Viking-inspired, Copenhagen-based producer DANHEIM has been creating his ambient soundscapes for over 10 years. Heavily inspired by his Danish roots, Reidar Olsen blends traditional Nordic instrumentation with electronic production – incorporating clever use of samples and a sprinkle of synths.
DANHEIM’s art has taken over the digital realm, hitting over a billion streams across streaming platforms in 2022, over 500 thousand subscribers on YouTube and even getting music featured in the popular 2013 TV-series ‘Vikings’.
‘Munarvágr’ and ‘Mannavegr’ are the first two albums released by Olsen under the DANHEIM moniker. For the first time since their release back in 2017, the records are reissued through Season of Mist on CD jakebox and vinyl formats. A completely new way to (re)experience the magic created by DANHEIM.

For fans of HEILUNG, WARDRUNA, GARMARNA, MYRKUR.
