Opis produktu

To be honest, just read what John Kevill wrote on "Tortured Existence" and paste it here, haha. "Epidemic Of Violence" (1992) is again a furious and bestial thrash assault verging on the border to death metal that contains such godly songs as "Human Dissection", "Aborticide" or the indeed very violent title-track and is highly recommended to anyone who likes to headbang to the hardest thrash metal imaginable. Beyond awesome!
