Opis produktu

HELLS HEADBANGERS is proud to present a brand-new EP from GOAT SEMEN, Fuck Christ, on CD, 12" vinyl, and cassette tape formats.

At ground zero of the rebirth and resurgence of South American black/death at the dawn of the new millennium, GOAT SEMEN delivered one of the most classic demos ever with their self-titled 2002 demo, which has seen countless re-editions in the past two decades. As their legendry grew to enviable levels, so, too, did the anticipation for these Peruvian devils' debut album. But alas, time passed and the fervor 'n' anticipation for that first full-length reached critical mass in the metal underground, taking on almost mythical status (not unlike Sadistic Intent's long-promised debut LP). Finally, it saw the unlight of day in 2015 as Ego Svm Satana: the ultimate GOAT SEMEN statement, in the making for literally a decade, the album became something of a veritable travelogue across the history of South American metal barbarity the prior three decades. The very end, and also the beginning, Ego Svm Satana was suitably CLASSIC, as expected.

But, GOAT SEMEN are never one for half measures, and much like that full-length took at least a decade before it emerged from hellfire fully formed, they've only released live albums and a couple splits since then - nothing as substantial as a fully-new recording. Now, nearly a decade after that momentous debut album, GOAT SEMEN return with a comparatively quick-hitting EP in Fuck Christ. Much like its unapologetic & unadorned title, the Peruvian devils waste no time, kicking in immediately with a swirlingly sulfurous maelstrom of classic GOAT SEMEN proportions. For a record that comprises five stout songs in 19 electric minutes, Fuck Christ feels simultaneously longer and quicker than that runtime suggests, so respectively satisfying and urgent is that hammering barbarity. Naturally, it wouldn't be GOAT SEMEN if everything wasn't attacking from every angle all at once, the feeling of imminent implosion lurking around every dark 'n' diseased corner; compared to Ego Svm Satana, Fuck Christ exacerbates that mania to an almost overwhelming degree even when the intensity dips down to a doomed trudge. But perhaps the most unique element on this new record is how relatively clean and clear its recording is, with each and every instrument sounding sharp and powerful - nothing "muddy" about GOAT SEMEN fucking Christ here - which in turn makes the band's inherent grit & grime sound stranger and more depraved. Put another way, there's nothing to hide behind here; there's simply no escape from Fuck Christ.

For those who still hail the old gods of equally early Sarcofago, Krisiun, Hadez, Sextrash, and Mystifier, no matter when their records arrive, you can always count on GOAT SEMEN to Fuck Christ!
