A dark, fluid and malevolent extreme metal masterpiece!

Welcome to the bizarre world of “Indicium De Mortuis” by Immortalis, a record where nothing is what it seems. This is a Death Metal album that channels the spirit of Possessed
and Slayer. If you want some dark, cryptic Death Metal with no mercy, then this is the stuff of kings. One look at the cover art and you know you’ll never be the same.

The album resembles many things, but none of them too closely. The production (courtesy of Andy Classen from Holy Moses) sounds like an early Dan Swanö recording and aged
well. The vocalist roars like Barney Greenway of Napalm Death,the riffs reminds one of Florida Death Metal (Deicide and Massacre especially), the eccentric rawness is not too
distant from the Austrian bands (e.g., Pungent Stench, Disharmonic Orchestra).

For old school Death Metal, it’s as special and haunting as they come, but with more doom as the special ingredients. Most of the riffs are mid-paced crushers while the drumming is ballistic bombs bombarding the earth.
You could play this album to five Death Metal veteran listeners and they would all find new comparison points.
You should your hands on this. As their only release, you have no excuse to let this one slip away from your ears.

“Indicium De Mortuis” is brilliant, but requires concerted effort and attention. The result is some of the most adventurous and fluid Death Metal of its time. No exaggeration.

• The only album of Immortalis is a German Death Metal classic from 1991
• Recorded and mixed by Andy Classen (Holy Moses, Legion of the Damned, Asphyx, Belphegor, Rotting Christ a.o.)
• Originally released by Morbid Music in 1991
• The original album is an expensive sought after release on CD and LP
• CD version includes the “Final Death” demo from 1993

Essential for old school Death Metal fanatics that like: Massacre, Possessed, Deicide, Slayer, Hypocrisy
