Opis produktu

Horror of the Zombies is the second album by American death metal / grindcore band **Impetigo**. It was released in **June 1992** and was a major influence in the grindcore and goregrind scene. 'Horror of the Zombies' has a much more structured and varied approach than debut album 'Ultimo Mondo Cannibale'. The songs are longer and the production on this album is thick and full. The music is still very much old school death metal. Impetigo are influenced by such bands as, Massacre, Autopsy, Repulsion, Master, and Autopsy on this album. This **re-release has expanded liner notes by Stevo, 2 extra live songs**, different artworks and many rare pictures in a 24 page booklet. A truly gore masterpiece, everything about it reeks of a B grade zombie movie
