Opis produktu

We are very proud to announce our cooperation with legendary 80's thrash metal act I.N.C. (INDESTRUCTIBLE NOISE COMMAND) to reissue their first two ripping classic albums from the late 80's, "Razorback" and "The Visitor".

Very underrated and never receiving the attention they truly deserved, it is an honor for us to work with this amazing band having been long time fans since the 80s. Described by the band themselves as angry, resentful, aggressive, violent, and vicious thrash, we couldn't have said it better!!! Originally released in 1987 and 1988 respectively and having been long OOP since then, fetching insane online prices, we are proud to offer these amazing classic thrash releases once again!

Next up, the band's crushing sophomore release "The Visitor"! This LP is designed after the original 1988 Giant Records LP release, taking elements from the original layout with attention to detail, even down to the logo and typeface for a touch of nostalgia. Also included are brand new liner notes from original band members Erik Barath, Dennis Gergely and Tony Fabrizi as well as old flyers and rare, unpublished classic band photos

Limited to 500 copies, this LP will be limited to 175 on black vinyl, 175 on swamp green vinyl and 150 on crystal clear vinyl, and will come housed in a 350 gram, gatefold jacket.
