After turning heads with the relentless 2024 EP Råtner på rot, Jordsjuk are back with their full-length debut: Naglet til livet (translates to 'Nailed to life'). Across twelve tracks and 36 minutes, the band delivers a visceral strike of raw, uncompromising metal - free of gloss, gimmicks and nonsense. Jordsjuk consists of Renton (drums), Mannevond (vocals), Sagstad (guitars), and Larsen (bass) - seasoned musicians from the Norwegian underground. Their sound sits somewhere between black, death, thrash, punk, and rock, forging a sonic identity as raw as it is deliberate. The lyrics, written in Norwegian, dive into personal collapse, trauma, and apocalyptic despair, delivered with uncompromising honesty.
