Opis produktu

Full-length debut of Portugese Kommando Baphomet is a work for fans of all blasphemy, rawness and basement sound in general. Bestial vocals, slashing and dense riffs, all that chaos and destruction. No respite and watering down. In a word, all that is best in oldschool Black/Death Metal. Nothing new here, but there is freshness in it, as well as energy. And that's the most important thing. It's hard to say even more here, this material speaks for itself and trying to find something more in it - besides directness and a specific plan for yourself and your art - does not make much sense. It is a material addressed to those for whom the essence of Metal art and the goal itself is a specific, traditional way of playing. Maybe this material will not conquer the scene, but it will certainly find its way to all enthusiasts of underground and its proven formulas. It must be said that Godz Ov War is lucky in finding such bands. There is nothing extraordinary about them, but each one has this spirit and a passion for the music played, the ability to create it and generate not only a coherent aesthetics, but also the right climate. And such a band is Kommando Baphomet. "Blood Gospel of Satanic Inquisition" is not pioneering, it is not something you would not meet here and there, but it can certainly pull you into its devilish abyss and hold there for some time. Honest and sinister Black/Death Metal!
