Description:
Over two decades of toil have passed, the aeon of the end was declared, the parasitic wisdom gained, and the formula of undoing achieved. MITOCHONDRION awoke from a deep, dreamless slumber, and after 11 agonizing years, pried loose from the Cronian clutches to integrate the suffering once again. The singular death metal entity has prepared in cloistered meditation to ascend the peak and proselytize the harrowing word once more.

The new MITOCHONDRION album “Vitriseptome”, released almost 14 years after the band’s last full-length “Parasignosis” is an axe head the size of the known universe brought down with frightening force to sever the neck of all creation. Forged and fermented with the blood, sweat, and bile over a decade from conception to completion: This Great Work nearly took the life of all involved, leaving all to question the true meaning of Death: enantiodromian obeisance to the Abraxan force under Saturn's guise.

This double album is overloaded and unbearable: Pour in what little life you have remaining to be pulverized, conflagrated, calcified, fermented, and purified.

“Vitriseptome” is 11 Alchemical Death Metal works, split over 17 tracks, to form a trilogy of 3 parts, in two phases, which elapses nearly 90 minutes in length.
