HELTER SKELTER PRODUCTIONS (distributed & marketed by REGAIN RECORDS) is proud to present the entire discography of NECRONY in a five-LP vinyl boxset, titled Corrupted Crescendos.

One of the most cult bands in an already-cult scene, NECRONY hail from the mythical Swedish death metal scene of the early '90s. Formed in 1990 in Örebro, during their four years together, NECRONY left behind a small-but-scathing body of work that included an album, a mini-album, a 7" EP, and two demos as well as a handful of unreleased rehearsals. The band also had the unique distinction of releasing three of those recordings on the super-cult Poserslaughter Records label. NECRONY posthumously further earned their cult status with their connection to successive grindcore legends Nasum: vocalist/bassist/guitarist Anders Jakobson would play with the latter during the entirety of their career, while drummer Rikard Alriksson would play with them during their first three years of existence. Both men would also have distinct musical careers with the likes of Coldworker and Genocide Superstars, respectively.

NECRONY would make their public debut with 1991's eight-song Severe Malignant Pustule. As colorfully suggested by its title, the band's first demo doubtlessly was indebted to Carcass - as were hundreds of bands back then, or arguably more! - but NECRONY nevertheless had a clear grasp of twisted songwriting and uniquely relied on slimy downtempo segments instead of the usual ultra-grinding tropes of the time. They'd further perfect this sound later that year on the two-track Mucu-Purulent Miscarriage EP, one of the very first records released by the aforementioned Poserslaughter.

Following those two recordings, guitarist Dan Wall would depart the band, and it wouldn't be until 1993 when NECRONY released their next recording. However, when they did, it was quite literally titanic: Pathological Performances, the band's debut album. Pared down to a duo of Jakobson and Alriksson did little to hamper the band's creativity, as Pathological Performances saw NECRONY hit their peak: the songwriting was supremely twisted yet somehow catchy, the recording was their clearest yet without losing their original crushing sliminess, and like their heroes Carcass, the lyrics were witty in their gore. Nevertheless, they'd release a promo tape the next year that featured two songs of even sharper and more crushing creativity, suggesting that NECRONY were only getting started.

And so it seemed, as their next recording, Necronycism: Distorting the Originals - recorded prior to the promo-tape, but released after it - was a mini-album of covers which included the likes of Carcass (of course!), Napalm Death, Repulsion, Impetigo, Bolt Thrower, and Carnage, all done the NECRONY way. Generally, such covers records served as a stopgap between album releases, and such was the hope for NECRONY. But another studio recording never came, and the duo's focus seemingly shifted to the then-young Nasum. NECRONY, ultimately, was RIP by 1994.

Thankfully, time has done nothing to dull the pus-filled power of NECRONY's body of work - in fact, it sounds more powerful (and pus-filled!) than ever. While an unauthorized "collection" surfaced in 2005, with the band's full approval does HELTER SKELTER hereby collect all those recordings plus bonus tracks from the covers record as well as unreleased rehearsal sessions

and one live track. Titled Corrupted Crescendos, this nearly-three-hour boxset is the definitive word on one of Swedish death metal's great "What Ifs" and a unique-yet-unsung entry into that hallowed canon. This boxset will include an extensive 24-page booklet, three stickers, and a patch, making it the ultimate NECRONY statement: long live Necronycism!
