Opis produktu

Remastered and joined together in a single release, the first two Nest EPs see the light again! Fabled Lore and Hidden Stream, originally released in 2000 and 2003, will finally be available on vinyl as part of a comprehensive reissue work via Avantgarde Music!

Nest is an atmospheric folk / acoustic group from Finland, formed in the summer of 1999, mainly focusing on the use of the Kantele, a traditional Finnish instrument. The project, led by multi-instrumentalist and visual artist Aslak Tolonen (also member of Syven and several others), has always kept a shy behaviour, releasing three studio albums along the quarter of a century and playing selected live gigs.

Fabled Lore / Hidden Stream is the first instalment in Nest's vinyl and cd reissue schedule on Avantgarde Music and will be followed by the releases of Woodsmoke, Trail of the Unwary (with bonus) and Mietteita - this last one for the first time ever receiving a physical release.
