Opis produktu

"Origins Of Aggression" will be a very special double album celebrating the formation of the band and the 40th anniversary of ONSLAUGHT's debut album "Power From Hell". "Origins Of Aggression" will feature a total of 22 tracks in double album format. CD 1 contains ten re-recordings of the most important ONSLAUGHT tracks from the early years, while CD 2 consists of twelve punk and metal cover versions that have made ONSLAUGHT the band they are today: Songs that were jammed during rehearsals, songs that inspired the musicians to play an instrument. A fascinating musical journey through the origins of the band.
