Opis produktu

CD in jewel case with 8-page booklet

One of the first wave of American black metal bands, PROFANATICA have purveyed primeval blasphemy on nigh for three decades. 'Rotting Incarnation of God' vomits forth a most vulgar strain of black metal ejaculate. Led by founder Paul Ledney, the trio desecrate everything sacred with a ferocious stream of chainsaw guitars and relentless battery. PROFANATICA's latest chapter is nothing short of blasphemous perversions, sacrilegious incantations, and furious, unrelenting black metal. The kings of USBM are back to bless you with another assault of unholy hellfire.
