Opis produktu

Quebecois Death Metallers Sedimentum formed back in 2018, giving us a magnificent debut album and several equally formidable shorter releases alongside it. Now they return with an even more doomy, eldritch mini-album for your listening displeasures...

Following some otherworldly ambience, those charnel guitars bring in a truly crushing spectacle of doomed extremity. Grotesque vocals and strong drums permeate the thick, tarry stringed arrangements. Their sinister and inhuman music has sunken even further into the pits of putrefying grave matter to conjure spectral apparitions of the dead. Those of you who already know this superb band will definitely recognise their unique sound while appreciating that the more low-register, slower tempo rumble of this cacophonous rot is even more intense than ever. Never afraid to blast out viscerally gripping savagery, the old school way, there is plenty of those more traditional moments tied into the abhorrent affair. However you like it, Sedimentum master Death Metal...

At a mere three songs, one could foolishly assume this record is lacking. But listen for yourself to discover three majestic pieces of masterful musical torment. In little over twenty minutes, Sedimentum grasp your soul with their ghoulish atmospherics and sepulchral hammering force. Exhuming the ancient spirits, this mini-LP is a must-listen for all true die-hards of the Death Metal underground who value both atmosphere and brutality in equal measure. There is no denying this band has a perfect grapple of both as these new constructions of contorting morbidity prove beyond doubt. Enter the ossuaries of Quebec with one of the finest bands of the underground as its lumbering corpse staggers toward you with only malicious intentions...
