Skepticism's celebrated debut album's 30th anniversary edition with bonus material out in November

Stormcrowfleet, **Skepticism**'s monumental 1995 debut, remains a landmark of funeral doom — an album that defined both a sound and a legacy. This 30th anniversary edition of the classic was newly mixed from the original tape reels by **Anssi Kippo** in 2018 at **Astia Studio** under supervision of the band and is now freshly cut for vinyl.

"*Stormcrowfleet* was originally released on CD. Instead of taking the easiest route we wanted to make the vinyl version the best it can be. We bought the multi-track tapes at the end of the recording sessions back in the day and have stored them for possible later use. This use became the *Stromcrowfleet* reissue - not just a vinyl edition but a complete remix of the album from the original recordings."

"In the remix sessions nothing was added or changed in the original recordings. The mix was done at Astia-studio with high quality analog equipment. In fact most of the equipment used did exist in 1995. What did not exist back in then was more than two decades of audio engineering tradition dedicated to processing extreme metal. In this process that tradition manifested in the form of Anssi Kippo - multiple award winning producer who handled the mixing in co-operation with the band members. In short the target was not to do a different mix but one with the original vision for the album with better equipment and engineering." comments the band.

The 30th anniversary edition of *Stormcrowfleet* features two bonus tracks from the 1994 demo cassette *AEOTHE KAEAR* cut directly from the original studio master tape, released on vinyl now for the first time ever. Also including a special anniversary edition booklet illustrating the making of the album.

A milestone of doom metal history, expanded and reintroduced for a new generation.
