CD Edition.

either available as noble digipack edition or as lavish edition.  
The lavish edition will be inline with the earlier ones. Further info will follow asap.

„Tempelschlaf” is THE RUINS OF BEVERAST's seventh full-length output and sees the band carrying on their sonic morbidity, noises and melodies of a human habitat in its sunset era, while maintaining and refining the widescreen low end that has been sustaining their sound almost from the beginning.

On the instrumental side, „Tempelschlaf” is stripped of quite some abdominal fat, forging the songs with a reduction in length and layers, cautiously leaning towards the stage part of things. Still, TROB's main discipline, the cineastic incarnation of aural nightmares, is omnipresent on the album. While synths and samples have always been playing a bizarrely adamant role in TROB's sound, they reach yet another level of psychedelia and insanity on „Tempelschlaf”.
