Opis produktu

As you can expect, we take special care with our digipak CD packaging and this one has a beautiful metallic matte effect throughout with gloss UV lamination done on parts of the stately artwork made by Kuba Sokolski (Thou).

French technical death metal band The Scalar Process have put together a sublime full length album imbibing everything great about the style and keeping a human element to not render it too mechanical. This is a highly flamboyant excursion into the realm, brought about with gusto and fervour, exploring various sinuous pathways and atmospheric passages, and leaving a lasting impression at the end of it all. Few albums can pull off this kind of poise and execution, straddling myriad moods and also not meandering long enough to lose momentum; the album remains suitably aggressive without losing the emotive value. This is for fans of bands such as Coexistence on the label, along with genre stalwarts such as The Zenith Passage, Beyond Creation, Archspire and more, upholding the standards and bringing their own to the table. The future is bright for this promising young band whose debut should go down as one of the finest in the genre in recent times.
