Opis produktu

TOXIC HOLOCAUST return to the scene with their best record yet. *Chemistry of Consciousness* is 11 songs of revved up high-energy punk-metal recorded by the band themselves and mixed by Kurt Ballou (Converge) for the most outstanding record in **TOXIC HOLOCAUST**'s already near perfect discography. *Chemistry of Consciousness* is the sound of Discharge on speed, Slayer with a punk rock chip on its shoulder, The Exploited on a Metallica overdose---the perfect marriage of punk angst and metal guitar licks and hooks. If there's one thing the punks and the heshers will agree on in 2013, its that **TOXIC HOLOCAUST**'s *Chemistry of Consciousness* is a rager of a record destined to top any worthwhile best of 2013 list.
