Opis produktu

[Urine of Abomination by Triumvir Foul](#) Decimating the godhead to its insipid form, on March 29th, Triumvir Foul returns with its third legion of the triumvirate under the Vrasubatlat banner – the Urine of Abomination. This EP is being released in conspiracy with Invictus Productions on CD, 12" vinyl, and cassette tape formats, with 20 Buck Spin handling manufacturing & distribution in North America.

Triumvir Foul returns after their short lull from Spiritual Bloodshed with a four-song exhibition showcasing their more caustic elements to date. Again slightly departing in theme, the Urine of Abomination takes a direct approach in discussing the obliteration of the godhead and humiliating him in piss. Sonically, Urine of Abomination carries on the sound of Triumvir Foul's more traditional death metal tendencies found on their demo An Oath of Blood and Fire and fuses it with more bestial black/death destruction. Urine of Abomination is the amalgamation of aural hell and fetishistic indignation – admonish the godhead and drown it in piss.
