Opis produktu

These recordings consist of the set we toured the States with during the summer of 2017 promoting our then newly released studio album Misantropologi. Some dubs and edits have been made in order to provide a better listening experience while maintaining the sheer raw energy of an Undergang live performance and now we’d like to share this disgusting abomination with you as a celebration of our first ten years of disease & decay. So for those who survived the concert and to all the rest of you crazy maniacs out there stay sick and never get well!!
