Opis produktu

The horrors of reality are the proof of your existence, and they will be brought to you via Avantgarde Music on January 31st, 2025

Void of Hope is a Finnish black metal trio born during a recording session. The whole album was composed and recorded in five days in the studio with -30°, -35° outside and in complete darkness for most of the day. Screams took place later and were recorded in 2 days.

Void of Hope includes members from Moonlight Sorcery and Ondfødt and consider themselves influenced by bands like Gris, Silencer, Lifelover, Coldworld and Austere.

Void of Hope can be a place or a state of mind, and their debut album Proof Of Existence is a journey through mental health and depression, the outcome of which may be triumph or giving up. Proof Of Existence started as depressive black metal but grew into much more.

Void of Hope is not an anonymous band, yet they do not consider their identities relevant, as regardless of what names are printed in the album, the music is all that matters.
