Producent	Osmose Prod.

Opis produktu

Auckland's WINTER DELUGE was formed mid-2005 by brothers Nathan and Aaron Baylis. The band soon established themselves within the Australasian Underground with their 2006 demo "Vehement Visions of Nihilism" and full lengths "As the Earth Fades Into Obscurity" from 2012 and "Devolution Decay" in 2016.

Through line-up changes and successful live campaigns in NZ and Australia (alongside seminal bands including ANGELCORPSE, AURA NOIR, DESTROYER 666, MARDUK, NOCTURNAL GRAVES and WATAIN) the band has continued to evolve with an enhanced sound and directive.

WINTER DELUGE is the Aural Strike upon Mankind...

WINTER DELUGE now presents their most violent and direct offering to date, fueled from a disdain of modern society and the self-destructive nature of the human race. Recorded and mixed by Raj Singarajah and Cam Sinclair (known for his work with BÖLZER, DIOCLETIAN, HERESIARCH, WITCHRIST) the new EP "Degradation Renewal" is a vicious and triumphant Black Metal assault rooted in the Second Wave which incorporates elements from Black/Death & Thrash metal.
