Opis produktu

Necropalace is a blackened, doom-laden foray into the horrific and the romantic, conjured by the ever-gestating vampiric entity known as WORM. WORM inscribed their first chapter with releases like 2021's *Foreverglade* and the 2023 *Starpath* split with *Dream Unending* (both on 20 Buck Spin). They carried that vision onto the road with the 2023 *Decibel Tour* alongside *Hulder* and *Devil Master*, as well as runs with *Gatecreeper* and *Frozen Soul*. Through it all, WORM has embodied the sounds of darkness with a rare sense of ambition. Mixed by Arthur Rizk (*Blood Incantation*, *Power Trip*) and featuring vaunted guitar master Marty Friedman on the album's closing track, "Witchmoon", *Necropalace* is the purest distillation yet of WORM's self-branded "Nekromantic Black Doom"—rendered in blood-stained technicolor. A cinematic, unforgettable modern metal masterpiece.
